PROFILE

Fullstack developer and Informatics Engineering graduate from Pamulang University, with hands-on experience building web applications using Laravel, Next.js, and NestJS across internship, freelance, and academic projects. Comfortable working across the stack, from database design and RESTful API development to deployment with Docker and CI/CD via GitHub Actions. Adaptable and collaborative in Agile/Scrum team environments, with a track record of contributing to real production systems from requirement analysis through deployment

EDUCATION

Pamulang University
Informatics. GPA: 3.77/4.00

Kota Tangerang Selatan
August 2022 - Present

EXPERIENCE

Internship x Trisya Media Teknologi (Ongoing)

Remote

Fullstack Developer

May 2026 - Now

- Collaborated in a team to develop a company profile website using Next.js with Sanity CMS for content management.
- Assisted in requirement analysis and feature mapping for a client company profile project prior to development.
- Contributed to the frontend development of an internal modular web framework built with Next.js to support future reusable projects.
- Worked with RESTful APIs and collaborated with backend developers during feature integration.
- Participated in Agile Scrum development using Jira for sprint planning and task tracking.
- Worked in a project utilizing MinIO for object storage and Prisma ORM as part of the application architecture.

Final Project x PT Next Generation Solutions

Kota Tangerang Selatan

Fullstack Developer

September 2025 – July 2026

- Contributed as a module developer (Sales & CRM) in a team-based ERP project.
- Focused on business logic, workflow design, and data handling for sales transactions and CRM processes.
- Coordinated with teammates on integration and system consistency.
- Implementing Laravel/PHP with MySQL for backend logic and database structuring.
- Using AI assistance for efficiency while maintaining full understanding of logic and structure.

Project-Based Internship x PT. Trustone Borneo Indonesia

Kota Tangerang Selatan

Backend Developer

March – June 2025

- Developed a full-scale invoice management system using Laravel (PHP) and MySQL, designing the database schema and writing complex SQL queries for data retrieval and financial reporting.
- Built the application's core logic with a focus on data integrity, including user authentication, input validation, and data processing workflows.
- Engineered RESTful API endpoints to handle data transactions between the front-end and database securely and efficiently.
- Gained foundational expertise in data management and the data lifecycle within a business application, from creation and storage to processing and presentation.

MSIB x Good News From Indonesia (GNFI)

Kota Tangerang

Data Analyst and Visualization for Digital Journalism

September – December 2024

- Processed and analyzed datasets from Kaggle using Google Colab, and created interactive visualizations with Flourish.
- Designed and distributed surveys to collect primary data for provincial case studies.
- Applied machine learning techniques for insights and enhanced decision-making.
- Created compelling infographics to present data insights clearly and effectively.

CORE SKILL

- Programming Languages : PHP, JavaScript, Python, C++
- Web Development : Laravel, Next.js, NestJS, Sanity CMS
- Database & ORM : MySQL, PostgreSQL, Prisma
- DevOps & Deployment : Docker, Docker Compose, GitHub Actions (CI/CD), Vercel, cPanel
- Tools & Platform : Git, GitHub, VS Code, Jira, MinIO
- Data Analysis & Visualization : SQL, Pandas, Flourish, Google Colab
- Soft Skills : Teamwork, Adaptability, Problem-Solving, Analytical Thinking
